Subject: Microsoft Settlement

I have been a consumer of Microsoft products since 1991. I have never felt disadvantaged by their pricing of their products. In fact my personal productivity has increased significantly every year as their products improved through innovations they incorporated into their software and services. I think the settlement is fair and it is time to end this costly legal battle. Our government has better battles to fight. I would urge the judge to pressure the remaining State s Attorney s to also settle the case and let s move on to more serious offenders than Microsoft which has helped make America the World leader in technology and software. Sincerely Rober J. Ballweber Jr. President
